

NKI Design presentation
Ben Gorion International Airport
Tel Aviv, Israëï, Middle East

Architect : SOM
NKI Scope : All counters with specified signs,
Main Materials : Stainless steel with glass and granite
Year of installation : 2004

Well-known American Architects SOM developed the design of the new Ben Gorion International airport. It is a beautifully designed airport with an exquisite choice of high quality materials. NKI group supplied all 136 check-in positions with signage and 33 gate with backwall configurations, immigration- and bank-counters. All counters, exceeding of a total of 400 units, are equipped with glass font panels and granite tops.
