

NKI Design presentation

JFK New York International Airport T4

New York, USA

Architect	: SOM, New York
Scope	: All counters,
Main Materials	: GRP (Glass-fibre Reinforced Polyester); stainless steel side panel and rubber foot rail.
Year of installation	: 1999-2001

A new highlight in NKI's history was the interior fit-out of the new Terminal 4 at New York's JFK airport. In operation since May 2001, the terminal is equipped with 144 check-in counters, 52 immigration service stations and many more other counters such as gate counters and service desks. All elements are manufactured in accordance with the highest NKI standards and show a perfect combination between GRP and stainless steel. Since this project NKI is involved in all kind of interior fit-out project at JFK T4.
